Diba Industries and Bio-Chem Fluidics Announce Partnership

Dear Valued Customer,

I want to inform you of some exciting advances in our global fluidics business.

I am thrilled to announce a partnership between Diba Industries Inc. and Bio-Chem Fluidics Inc. that will better serve you. We are combining our sales and engineering teams to result in a **single partner dedicated to solving your fluidic needs**. Here's what you can expect from the partnership:

Centralized access to a robust product and service portfolio – Our combined product portfolio will enable complete fluidic control through the manifolds, tubing and fitting assemblies, high precision probes, heaters, and labware components produced at Diba Industries and a variety of precision dispense piston and microfluidic pumps, valves, and accessories produced at Bio-Chem Fluidics.

Enhanced global scalability – With over 90,000 ft² of combined global manufacturing space, our supply chain and production capabilities are now stronger and more diverse.

Bespoke design capabilities – Our 70+ years of combined expertise, flexible engineering process and expanded investments in innovation means you will receive greater accuracy, reliability, and customization for your fluidic component design solutions.

Our service commitment to you is unchanged. Business will continue as usual with both entities, and the partnership will have no anticipated impact on production or daily operations.

I am confident that this partnership will allow us to better serve all your future needs, and I look forward to growing our relationship. In the meantime, please do not hesitate to contact your key account manager with any questions you may have.

Thank you for your continued trust in us, especially through these unprecedented times, and for your dedication to making the world healthier every day.

Sincerely,

Tim O'Sullivan
President
